## **Beartooth Flyfishing History**

Since our beginning in 1982, **BEARTOOTH FLYFISHING** has earned a high reputation based on quality, integrity and innovation. Through our extensive product development and field testing, we have met the increasing demand for specialized fly-fishing products needed by today's more sophisticated fly fisherman. Our product research has been conducted on many of the Blue Ribbon waters of the West, including the waters of Yellowstone National Park, Spring Creeks of Idaho and Montana, the Madison, Ruby, Beaverhead, Big Hole, Jefferson, Bighorn, and Missouri Rivers of Montana and Steelhead Rivers of the Pacific Northwest and British Columbia.

We are the largest manufacturer of custom tied Braided-Butt Leaders in the world. We have never stopped improving our initial concept of Quality and Innovation, resulting in a complete selection of floating and sinking leaders in a variety of lengths, tapers, colors, and weights that meet the complete range of surface and subsurface fly-fishing situations the angler may encounter.

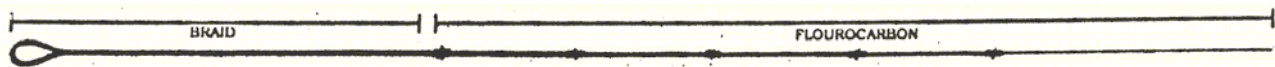

We are proud to say, that our leaders and related products have been developed here in Montana. This gives us complete control over the Beartooth quality that we are known for.

This brochure will aid you in selecting the proper "***Perma-Float***", "***Illusion Fluorocarbon***", "***Museum Quality Monofilament***", and "***Lead Core***" Leaders, needed for all the different fly-fishing situations you may encounter, and should make you a more effective angler in the process. We also have a complete selection of "***Knotless Leaders***" in 7 1/2', 9', and 12' lengths. Also complimenting our above selection we offer our "***Fluorocarbon Tippet Material***" in sizes ranking from 80 lb. to 7x tippet sizes.

### **Beartooth “Fluorocarbon” Illusion “Perma-Float” Braided Butt Leaders**

A Revolutionary New Leader Design Incorporating the advantages of our *“Perma-Float”* Braided Butt and our illusion Fluorocarbon Transition Sections and Tippet. The *“Perma-Float”* process permanently impregnates our hollow-multi stranded butt section with three different types of hot waxes. This impregnation eliminates any unwanted water spray and increases the mass (weight) of the Braided Butt resulting in a perfect turnover of the leader time after time. With the addition of our *“Illusion”* Fluorocarbon Transition sections and tippet, these leaders appear to be invisible in water. Fluorocarbon exhibits low visibility, great wet knot strength, superior abrasion resistance, are unaffected by UV radiation and have a higher specific gravity than conventional monofilament for a faster sink rate. The diagram below will show the construction of our *“Fluorocarbon” illusion “Perma-Float”* braided butt leaders indicating that our braided butt section constitutes 1/3 of the leaders overall length while the other 2/3 of the leaders length is comprised of hand tied fluorocarbon transition sections and tippet.

*Beartooth “Fluorocarbon” Illusion “Perma-Float” Braided Butt Leaders* are designed for a variety of fishing situations ranging from casting small dries, nymphs, and emergers to large streamers, dries and heavily weighted nymphs. The floating butt section also acts as a strike indicator but will sink when being dragged under weighted streamers, nymphs, and split shot.

#### ***“Fluorocarbon” Illusion “Perma-Float” Braided Butt Leaders:***

### **Beartooth Sinking "Lead-Core" Braided Butt Fluorocarbon Leaders**

We've created these "***Sinking Leaders***" to be used with ***Sink-Tip, Full Sinking*** and ***Shooting Head*** fly lines, dramatically increasing the sink rate of these lines. In fact, the leaders sink faster than the fly lines they may be used with and actually pull the fly line down with them. These ***Sinking Leaders*** are also effective when used with a ***Floating Fly Line*** as a removable ***Sink Tip***. ***Beartooth Sinking "Lead-Core" Braided Butt Leaders*** feature a ***Full Lead Wire*** section inside our ***Braided Butt section***.

***"Lead-Core" Braided Butt Leaders tied with "Fluorocarbon" transition sections and tippets***

Note: the 7 1/2' and 9' length incorporates a full 36" Lead Wired Braided Butt section making these lengths customer favorites.

6', 7 1/2', & 9' length

20 lb., 15 lb., 0x to 6x tippets

**Cost: \$8.00 each**

**Beartooth “Museum Quality” Hand-Tied Full Fluorocarbon Leaders**

Our full “**Fluorocarbon**” hand-tied “**Museum Quality**” Leaders are constructed with steep tapers for positive turnover. Now all the advantages of “**Fluorocarbon**” are combined in our hand-tied leaders. Low visibility, great wet knot strength, superior abrasion resistance, unaffected by UV radiation and “**Fluorocarbon**” has a higher specific gravity than Monofilament.

***“Full Fluorocarbon” Museum Quality Hand-Tied Leaders:***

7 1/2', 9', 10', 12', &amp; 14' lengths

20 lb., 15 lb., 0x to 7x tippetts

**Cost: \$5.00 each****Beartooth “Museum Quality” Hand-Tied Monofilament and Fluorocarbon Leaders. Part “Chameleon” Maxima (Butt Sections) Part Amazing, Transition Sections and Tippet Hand-Tied Fluorocarbon**

Our “**Museum Quality**” hand-tied monofilament and “**Fluorocarbon**” leaders are constructed with steep tapers for positive turnover. They are available in a variety of lengths, colors, and custom options. As with all of our leaders they are hand-tied here in Montana which gives us complete control over that **Beartooth** quality that we are known for.

Available in “**Chameleon**” Maxima (butt sections) with Fluorocarbon Transition and Tippet Sections

**Beartooth “Illusion Fluorocarbon” Tippet Material**

Dan started flyfishing in 1967; his Dad had fishing and hunting retail stores. Since 1967 the single best product that Dan has seen is “Fluorocarbon” tippet material. For several seasons Dan has used “Fluorocarbon” while fishing himself and guiding. Resulting in almost no break offs; ability to use one “X” size higher because of the material’s invisibility; and fishing longer stretches without personal problems from tangles and loss of flies. Available in soft bobbin or snap together spools.
