

Catalog 2025

The Delektable Fly collection represents 45 years of guided fly fishing experience on the world famous rivers of southwestern Montana, recreational fishing including Steelhead fishing in other states, and 20+ years of fly fishing in the Bahamas and the Caribbean. We are confident that our trout patterns encompass a range of insect and fish imitations that are productive in trout fisheries across the globe. Our saltwater patterns were designed specifically for the tropics, but do exceptionally well for inshore fish species at higher latitudes. Beartooth Flyfishing strives for excellence in our products. Our flies are no exception. All of the fly patterns we produce have been approved by our head designer Dan Delekta, his staff, guides and friends. Each pattern has been tied, tested and modified, and only the most effective are put into production. Our flies are tied with the highest quality materials available and with precision craftsmanship. For quality assurance, our staff inspects each fly order before it is shipped. Customer satisfaction is our top priority at Beartooth Flyfishing. And as always, we welcome you to contact us for more information or questions regarding Delektable Flies.
